Sacramento, California

Dear Paula:

Our Office is in the final process of reviewing the National Register applications for the July agenda. There are a number of items needed for the completion of the Rosebud Ranch applications

Item #4 Owner of Property:

Would you please send the address of the barn owner Mr. Lambert? We will have to have this address by the 25th in order to notify him of the hearing.

★ Item #8 Significance:

Page 2 of the continuation sheet seems to restate information which was already included earlier on the Statement of Significance..I would like to edit the material and end the continuation sheet in approximately mid page after what appears to be a summarizing statement of the significance of the farm/ranch complex. How does that sound?

Item #10 Geographical:

Could you please supply the exact acreage...the boundaries have to be precise and the acreage must exactly match the boundaries.

Additional Documentation:

The photographic labels are incomplete; could you please let me know who the photographer was and the current location of the negatives?  
Also, the National Register will not accept xerox copies of photos or pictures; you should photograph the historical sketch of the Rosebud Ranch.

I will need all of the above information before the 25th in order to know whether the application can be finalized and put on the July agenda.

Sincerely,

Carol Branan  
Architectural Historian  
Office of Historic Preservation
